

Dr. Jürgen Richt would like to invite you to the November 13th and 14th symposium titled “Emerging Infections: A Tribute to the One Medicine, One Health Concept”. This symposium serves a dual purpose: to present current scientific topics and to commemorate the opening of his new laboratory facilities at Kansas State University (K-State).

Symposium: “Emerging Infections: A Tribute to the One Medicine, One Health Concept”

When: November 13-14, 2008

Where: Kansas State University, Manhattan, KS

The event will kick-off at the K-State Student Union the evening of November 13th featuring keynote speakers like Dr. Robert Webster, Dr. Hilary Koprowski, Dr. Albert Osterhaus and others.

Friday, November 14th will have four workshops with speakers from around the world focusing on topics relating to “Prion Diseases, Influenza, Bunyaviruses, and other topics”. All of these speakers have been collaborators with Dr. Richt in the past, present, or future and are considered experts in their respective fields.

On November 13th and 14th, we will also provide tours of the new 115,000 sq. ft. “state-of-the-art” BSL-3/BSL-3 Ag facility, called Biosecurity Research Institute, recently opened on the Kansas State University campus.

We sincerely hope you will be able to attend the symposium.

Please complete the online registration form to reserve your place at the symposium. There is no registration fee to attend the symposium, but you must register by November 5, 2008! Registrations received after November 5th are not guaranteed meal tickets.

Best regards,

Dr. Juergen Richt
