

Changing Email Address Attached to Facebook

It is always good to periodically check all of your settings in Facebook to make sure they have not changed.

Here you will learn how to change the email address associated with your Facebook account.

Log into your facebook account and click on Account on the far right of the toolbar.

Clicking on the Account down arrow will bring up a menu. From this menu select "Account Settings"

Click on "Linked Accounts"

Click on "Change"

The first line shows the email currently associated with your facebook account. You can remove that email and under "New Contact Email" put in the new email account you want associated with your facebook account, and click on "Add New Email".

The new account is now saved.
