Career News:

I began my career as a Captain in the US Army Veterinary Corps at Ft. Campbell, KY, including a combat tour in Afghanistan. Upon completion of my service I worked at a small animal practice for several months before taking a contractor position with the Department of State and deployed as a contract veterinarian to Afghanistan and Iraq. I then began my own mobile practice, however, the practice didn't survive the local economy. I returned to contracting and will be working overseas for the foreseeable future.

Education:

DVM, Kansas State University, Manhattan, Kansas, 2013

Family News:

I adopted a German Shorthair Pointer named Hank.

Advice to Students:

Pick good externships, pick good mentors, and always believe in yourself.

Class Comments:

I'm proud of you all.

I finished a combined anatomic pathology residency and PhD program at Washington State University in 2021 and became board certified later that year. I'm currently a toxicologic pathologist for Labcorp Drug Development, specializing in inhalation pathology. After being onsite in New Jersey for the last several years, I'm headed back to Kansas City to work remotely. I'm eager to show my kids my alma mater and live in the state I love.

Children: Warren James - 8/9/15

Career History, Community Service, Etc.:

I started out at Banfield in Savannah, GA where I worked as an associate veterinarian for one year. I moved back to Manhattan in 2014 to work at Little Apple Veterinary Hospital as an associate veterinarian until March 2018. Also in March 2018, we broke ground on our new practice which should be open in June 2018.

I have volunteered with Animal Alliance Partners in Hays, KS doing low cost feline spays and neuters.

Krystal Leigh Miller

Company: Wildcat Vet Clinic

Spouse: Tanner Miller

Children: Easton Miller 06/30/2016

Career News: Abigail Miller 11/02/2020

I practiced at Belton Animal Clinic and Exotic Care Center for 7 years before having my second child. Once she was born I decided I wanted to go part time and be closer to home. I ended up in Louisburg at Wildcat Vet Clinic in February 2021 working alongside my husband, Tanner Miller and his wonderful associates and staff. I decided to stop during surgeries, except for the occasional laceration, mass removal or dental prophylaxis. I love having a more balance work/home career.

Education:

DVM, Kansas State University, Manhattan, Kansas, 2013

BS in Biology, University of Nebraska at Omaha, 2008

Professional Memberships:

KSVMA, AVMA, AAHA

Family News:

We had our second child, a daughter, in November 2020. During COVID it was extremely hard not to have family at the hospital. We also found out as a birth diagnosis Abigail has Trisomy 21. She has been a blessing to our little family and has made great strides so far in the last 2.5 years. We love to travel to National Parks. The most recent was in our fifth wheel camper to Big Bend, Guadalupe Mountain, Carlsbad Caverns, White Sands, Saguaro and Petrified Forest. We are also in the process of building out forever home in Louisburg.

Advice to Students:

Definitely work at a clinic for a good 1-2 years before deciding that lifelong career choice. Talk with previous veterinarians on work life balance. There are many other pathways in veterinary medicine besides a general practitioner. Don't stay in a position where it drains you, move on to something that inspires you and makes you enjoy going to work everyday. Find a great mentor!

Class Comments:

Miss you all and I hope this path has taken you to exciting and wonderful things in your life. I wish there was more time off in a year to travel and get together to see more people that we created a family bond with, I hate missing the 10 year reunion. May you all have fun and prosper in life! Congratulations to all the small and big things in life that have happened thus far!! You are all amazing! Don't sell yourself short!

I completed a 1 year (2018-2019) clinical instructor position in zoo and aquatic animal pathology sponsored by the University of Florida and Disney Animal Health. This position was based at Disney's Animal Kingdom and EPCOT The Seas with Nemo and Friends in Orlando, FL. I successfully passed the certification examination for veterinary anatomic pathology in the summer of 2018. After that I spent approximately 1 year (2019-2020) at the state veterinary diagnostic lab in Fargo, ND before relocating back to the state veterinary diagnostic lab in College Station, TX where I have been a veterinary pathologist since Fall 2020. Since being at the Texas state diagnostic lab I have continued to enjoy providing pathology services to state zoos and aquariums.
