

GET CAUGHT RECYCLING!

RECYCLING GOING GREEN!!!

Thank You for Volunteering to Recycle.

What's In It For Us!

If we all place recycling items in the correct containers, the custodial staff will have more time to spend on detail cleaning in offices, main entries and stairways to ensure better customer service to our building users, staff, students and visitors on campus.

Recycling helps by reducing the amount of waste going to the transfer station and then on to the landfill. That saves the University money in the long run.

On June 22, 2006 Governor Kathleen Sebelius encouraged state workers to recycle, reduce waste and purchase environmentally friendly products. Governor Kathleen Sebelius also encourages state workers to **GET CAUGHT RECYCLING!**

Any questions about recycling items please call 532-6711 or e-mail Facilities WorkOrder Request@vet.k-state.edu

The Way Recycling And Trash Service Will Work.

All office trash containers will only be emptied once per week.

Desk Side recycling containers will be emptied 1 or 2 times per week depending on the volume.

Trash in restrooms, classrooms, common areas, break rooms and labs will be emptied as needed.

No in-lab recycling due to bio-hazard issues.
