

Pathobiology Graduate Student Club

Welcome Back! Spring 2004

The club aims:

To provide a forum for the Graduate students of Diagnostic Medicine/
Pathobiology to know each other - which labs and lab projects in a social setting

Encourage the social, educational and professional interests of the graduate
students in the department

Increase interdepartmental communication and stimulate exchange of ideas.

February 6th 2004, Friday 4:00 pm in Trotter 301, we will be meeting for
the first time and to make it a successful one we all need to be a part of it. This
will provide an opportunity for the new graduate students to know their fellow
students.

To make it a success we need to discuss the following:-

When is the best time to meet

How often should we meet (hard to say with busy semester)

What are the things to be discussed

Should we have a guest speaker

Social events like going on a picnic etc.,

Membership fee?

These are a few things. We are open to suggestions from you.

Let's make it a big event!

See you all there!

Refreshments will be provided

PS: Mark your calendar

Conveners

Sambasivarao Tadepalli (Graduate student)

Susan Moore (Graduate student)

Post Doctoral Fellows are also welcome!
