

Spring 2020 Seminars
Diagnostic Medicine and Pathobiology
Thursday, 3:30 p.m.

Mara Conference Center, 4th Floor Trotter Hall

JANUARY 30

No Seminar

MARCH 19

Morbilliviruses, much more than measles. Why it's critical to keep a close eye on the animal cousin

Paul Duprex, PhD
 Vaccine Research, Microbiology & Mol. Genetics
 University of Pittsburgh

FEBRUARY 6

Mutagenesis in Ehrlichia and Anaplasma species aids in studying pathogenesis and vaccine development

Roman R. Ganta
 Diagnostic Medicine and Pathobiology
 Kansas State University

MARCH 25

Title to be announced

Kathryn Rief
 Diagnostic Medicine and Pathobiology
 Kansas State University

FEBRUARY 13

The development of a diagnostic assay using oral fluids for the detection of Senecavirus A

Ashley Zelenka
 Diagnostic Medicine and Pathobiology
 Kansas State University

APRIL 2

Zero by 30: The initiative to end human deaths caused by dog-mediated rabies

Susan M. Moore
 Diagnostic Medicine and Pathobiology
 Kansas State University

FEBRUARY 20

Gene therapies for muscle disease: From pre-clinical studies to human clinical trials

Peter P. Nghiem, DVM, PhD
 Veterinary Integrative Biosciences
 Texas A&M University

APRIL 9

FAD outbreak will take a village

Jamie Henningson
 Diagnostic Medicine and Pathobiology
 Kansas State University

FEBRUARY 27

Protective efficacy of vaccination-derived anti-Japanese encephalitis virus monoclonal antibodies in a miniature swine model

Christian Young
 Diagnostic Medicine and Pathobiology
 Kansas State University

APRIL 16

Title to be announced

Joseph J. Gillespie
 Microbiology and Immunology
 University of Maryland School of Medicine

MARCH 5

No Seminar

APRIL 23

Mathematical modeling of vaccination strategies for foot and mouth disease control on the U.S. beef feedlots

Tara Gaire
 Diagnostic Medicine and Pathobiology
 Kansas State University

MARCH 12

SPRING BREAK

No Seminar

APRIL 30

MAY 7

MAY 14 Finals

No Seminar

Thank you for attending the Seminar Series.
