VETERINARY HEALTH CENTER PROTOCOLS

Welcome to the VHC Health Care Team!! This VHC Protocol is your guide for participation as a member of the VHC Veterinary Health Care Team. The protocol was established to assure the very best health care possible for our patients, to provide good service to our clientele, and to promote an environment for teaching and learning clinical veterinary medicine.

You are urged to make your experience here productive. The clinical faculty will assign clinical responsibility to students willing to meet the high standards of veterinary care required in the VHC. Your level of participation will be, to a large measure, determined by your progress in learning clinical veterinary medicine. If you are having difficulty, you are urged to consult with a member of the faculty, the Section Head, and/or the Hospital Director.
