

EQUINE WishList

Equine Specialists at the Veterinary Health Center provide a range of services in expert equine care including internal medicine, surgery, and theriogenology (reproduction) and on-farm care in field services.

WishList items have been carefully considered to enhance the quality of patient care and education of future veterinarians. For more information, please contact the Development Office at 785.532.4378.

Meet the EQUINE SPECIALISTS

Elizabeth Davis, DVM, PhD, DACVIM
Associate Professor and Section Head

Laurie Beard, DVM, MS, DACVIM
Clinical Associate Professor

Warren Beard, DVM, MS, DACVS
Professor

Maria Soledad Ferrer, DVM, MS,
DACT
Clinical Assistant Professor

James Lillich, DVM, MS, DACVS
Associate Professor

Chris Blevins, DVM, MS
Clinical Assistant Professor
Equine Field Service

Elizabeth Devine, DVM, MS
Clinical Assistant Professor
Large Animal Emergency Surgery

WishList

Endowed Lameness Expert \$1 million

The addition of a dedicated lameness expert would significantly increase the case load capabilities at VHC. Lameness is a common and treatable condition that would provide increased opportunities for VHC.

Lameness Facility \$750,000

A state-of-the-art building dedicated to the needs of examining and treating lameness in horses would improve the success rates of treatment while providing additional safety and benefits to both the animals and faculty.

Eklin Digital Radiography \$130,000

An Eklin would provide the equine unit with advanced technology to digitally image horses. This achieves higher success in diagnosis, treatment and teaching opportunities for students.

CT (Computed Tomography) Table \$75,000

A table for positioning a horse during a CT scan is critical for the equine unit to deliver advanced diagnostics.

Large Fragment Locking Instrument Set \$31,000

This system would provide necessary training for residents in orthopedic surgery and advanced treatment options for clients.

Miles Fund, Equine - Any Amount

A fund dedicated to helping animals receive the treatment and care required to maintain quality of life.
