Summer Veterinary Research Fellowships Massachusetts Institute of Technology

The Division of Comparative Medicine at the Massachusetts Institute of Technology has a number of NIH funded openings for veterinary students who have an interest in pursuing research during the summer months. Research Fellows will participate in existing research projects in the laboratories of established investigators at Massachusetts Institute of Technology or collaborating institutions such as Harvard and Tufts. Research fellows will augment their understanding of animal based research by participating in clinical and laboratory rotations.

Fellows will receive a stipend of approximately \$1,700 per month. Applicants must have completed one year of veterinary school and be U.S. citizens or permanent residents.

Interested candidates should send a cover letter, cv., veterinary school transcripts and two letters of recommendation to Dr. James G. Fox (jgfox@mit.edu), 77 Massachusetts Avenue, 16-825, Cambridge, MA 02139. Please call 617-253-1757 if you have questions or email Bruce Brown (bbrown@mit.edu).

We are flexible regarding start and end dates. Applicants should plan to spend a minimum of six weeks and not more than 12 weeks in the program. Applications should be submitted early in the calendar year and no later than April 1. Applications are reviewed as they arrive so there is the possibility all slots will be filled prior to April 1.

Accepted candidates need to have a TB test prior to their arrival at MIT.
